

Percent of GE Soybeans Planted

The use of genetically engineered (GE) soybeans has greatly increased since 2000. The USDA tracks the planting of these crops, and their data on *All GE Varieties* is illustrated here.

Acres Planted Per State

Map designed by Louis Umerlik on April 12, 2010, for foodpolitics.com. Data provided by USDA & NASS. State boundaries provided by ESRI.

Total Acreage as State Size

This graphic shows the acreage of GE soybeans planted in 2000 and 2009 ranked as the size of a state.
